

Philips  
Clean air system

AC4062

# Fresh air at home - Always

with 6-stage CleanAir System

## Fresh air

- 6-stage CleanAir System for fresh air
- 3-stage ElectroClean system charges and traps all particles
- Active oxygen sterilizes pollutants and rejuvenates filter
- 2-stage FreshAir system efficiently removes gases and odours

**PHILIPS**  
sense and simplicity

# Highlights

## 6-stage CleanAir System

The advanced and innovative 6-stage CleanAir System removes and sterilizes even the finest particles and a wide spectrum of gases and odours. \* The 3-stage ElectroClean filtration system efficiently removes particles \* The 2-stage FreshAir filtration system removes gases and odours \* The active oxygen sterilizes trapped particles and constantly rejuvenates the zeolite filter, ensuring longlasting superiour performance

## 3-stage ElectroClean filtration system

The 3-stage ElectroClean filtration system works three ways. \* First, the pre-filter blocks larger particles, such as hairs, animal dander and house dust allergens. \* Second, the finer particles that have passed through the pre-filter, including bacteria and viruses, are charged by the Corona Field Charger. \* Third, the Electro-Static Precipitation (ESP) filter attracts these charged particles to its surface and keeps them safely trapped. With average use, the cost-effective ESP filter only needs to be replaced once every five years.

## Active oxygen

The active oxygen, which is generated by the Corona Field Charger, sterilizes harmful germs such as bacteria and viruses that are trapped in the Electro-Static Precipitation (ESP) filter. It then passes through the zeolite filter, where it oxidizes the trapped gases, rendering them harmless. Thanks to this process, the zeolite filter is constantly rejuvenated and its life can be extended over many years.

## 2-stage FreshAir filtration system

The 2-stage FreshAir filtration system uses advanced Nano-Confined Catalytic Oxidation (NCCO) technology. Firstly, the hi-grade zeolite filter traps a wide spectrum of gases and odours and subsequently uses the active oxygen that passes through to neutralize them, constantly rejuvenating the filter. Compared to the traditional activated carbon filter, this hi-grade zeolite filter performs more stably in different humidity conditions, and because it is rejuvenated by the active oxygen, it can last a much longer life of upto five years.

# Specifications

## Technical Specifications

- Voltage: 220 - 240 V
- Frequency: 50/ 60 Hz
- Power Consumption: 61 (at 220V~, hi speed), 65 (at 220-240V~, hi speed) W
- CADR: > 128 ft<sup>3</sup>/min
- Particle removal efficiency: > 99 (particle size at 0.02 - 10 µm) %
- Gas removal efficiency: > 99 (run at hi speed over 3 mins inside 1m<sup>3</sup> box) %
- Recommended Room Size: Up to 40 m<sup>2</sup>
- Operating Temperature: 5 - 40 °C
- Operating Relative Humidity: 20 - 90 %
- Noise Level: < 47 (JIS compliance) dB
- Cord length: 1.8 m

## Finishing

- Color - Air outlet mesh/ Control panel: Christal Silver
- Color - Front Cover/ Air inlet mesh: Christal Silver
- Color - Rear Housing: Translucent Algiers Blue
- Color - Control button: Silver Blue

## Dimensions and weight

- Product: Approx. H490 x W481 x D220 mm; 7.9Kg
- F Box: Approx. H575 x W552 x D283 mm; 9.7Kg

## Logistic data

- CTV: 8834 062 00000
- 12 NC: 8834 062 00010 (Western Europe), 8834 062 00710 (China)
- EAN F Box: 87 10103 31458 5 (Western Europe), 87 10103 31460 8 (China)

## Replacement

- ESP particle filter: AC4106
- Zeolite gas filter: AC4116

Issue date 2009-08-10

Version: 4.1
